BBA

Protein Structure & Molecular Enzymology

Vol. 1161, 1993

Cumulative Contents

Editorial vii

Information for Contributors ix

Regular Papers

Purification and properties of an oxalate oxidase from leaves of grain sorghum hybrid CSH-5
Satyapal and C.S. Pundir (India) 1

Influence of the N- and C-terminal chains on the zinc-binding and conformational properties of the central zinc-finger structure of Moloney murine leukaemia virus nucleocapsid protein: a steady-state and time-resolved fluorescence study
Y. Mely, H. De Rocquigny, E. Piémont, H. Déméné, N. Jullian, M.-C. Fournié-Zaluski, B. Roques and D. Gérard (France) 6

Purification and characterization of pyruvate ferredoxin oxidoreductase from the hyperthermophilic archaeon *Pyrococcus furiosus*
J.M. Blamey and M.W.W. Adams (USA) 19

Transition-state discrimination by adenosine deaminase from *Aspergillus oryzae*
J. Grosshans and R. Wolfenden (USA) 28

^{1}H-NMR characterization of the human myocardium myoglobin and erythrocyte hemoglobin signals
U. Kreutzer, Y. Chung, D. Butler and T. Jue (USA) 33

An inhibitory monoclonal anti-protein antibody and an anti-peptide antibody share an epitope on rat cytochrome *P*-450 enzymes CYP1A1 and CYP1A2
R.J. Edwards, B.P. Murray, S. Murray, A.M. Singleton, D.S. Davies and A.R. Boobis (UK) 38

Actinomycins as proteinase inhibitors
C. Betzel, R. Rachev, P. Dolashka and N. Genov (Germany, Bulgaria) 47

The unfolding and attempted refolding of the bacterial chaperone protein groEL (cpn60)
N.C. Price, S.M. Kelly, G.J. Thomson, J.R. Coggins, S. Wood and A. Auf der Mauer (UK) 52

Identification of the sites of modification on bovine carbonic anhydrase II (BCA II) by the salt-bridge reagent cyanogen, C_2N_2
G. Ghenbot, T. Emge and R.A. Day (USA) 59

The dependence of the lipolytic activity of *Rhizopus arrhizus* lipase on surfactant concentration in Aerosol-OT/isooctane reverse micelles and its relationship to enzyme structure
E.D. Brown, R.Y. Yada and A.G. Marangoni (Canada) 66

The one-electron reduction potential of several substrates can be related to their reduction rates by cytochrome *P*-450 reductase
J. Butler and B.M. Hoey (UK) 73

Effect of salt concentration of buffer on the binding of sodium dodecyl sulfate and on the viscosity behavior of the protein polypeptide derived from bovine serum albumin in the presence of the surfactant
S. Shinagawa, K. Kameyama and T. Takagi (Japan) 79

The kinetic mechanism of yeast phospho-*enol*pyruvate carboxykinase
A.M. Jabalquinto and E. Cardemil (Chile) 85

Structure and composition of ferritin cores from pea seed (*Pisum sativum*)
V.J. Wade, A. Treffry, J.-P. Laulhère, E.R. Bauminger, M.I. Cleton, S. Mann, J.-F. Briat and P.M. Harrison (UK, France, Israel, The Netherlands) 91

Purification and characterization of two metalloproteinases from squid mantle muscle, myosinase I and myosinase II
Y. Okamoto, H. Otsuka-Fuchino, S. Horiuchi, T. Tamiya, J.J. Matsumoto and T. Tsuchiya (Japan) 97

Characterization of the activation of pro-urokinase by thermolysin
P.A. Marcotte and J. Henkin (USA) 105

Regular Papers

Epitope mapping and characterization of monoclonal antibodies to human protein C
M. Takahashi, M. Kimura, K. Kurosawa-Ohsawa, A. Iwaki, S. Tanaka and T. Matsuishi (Japan) 113

Substrate-binding region of cytochrome *P*-450$_{scc}$ (*P*-450 XIA1). Identification and primary structure of the cholesterol binding region in cytochrome *P*-450$_{scc}$
M. Tsujita and Y. Ichikawa (Japan) 124

Catalytic properties of the CMP-*N*-acetylneuraminic acid hydroxylase from the starfish *Asterias rubens*: comparison with the mammalian enzyme
W. Schlenzka, L. Shaw and R. Schauer (Germany) 131

Isolation and characterization of diadenosine tetraphosphate (Ap_4A) hydrolase from *Schizosaccharomyces pombe*
A.K. Robinson, C.E. De la Peña and L.D. Barnes (USA) 139

Native and denatured Zn cytochrome *c* studied by fluorescence line narrowing spectroscopy
V. Logovinsky, A.D. Kaposi and J.M. Vanderkooi (USA) 149

Purification and properties of multiple molecular forms of yeast peptidyl prolyl *cis-trans* isomerase
H. Hasumi and T. Nishikawa (Japan) 161

Inhibition of intestinal peroxidase activity by non-steroidal antiinflammatory drugs
R. Chatterjee, U. Bandyopadhyay, D. Bhattacharyya and R.K. Banerjee (India) 168

Isolation, partial characterisation, and amino acid sequence of α-lactalbumin from platypus (*Ornithorhynchus anatinus*) milk
D.C. Shaw, M. Messer, A.M. Scrivener, K.R. Nicholas and M. Griffiths (Australia) 177

Antibodies to recombinant fragment 212–276 of protein C specifically recognize the intact human molecule
I. Fijalkowska, A. Babinska, A. Ligocka, G. Pluciennicczak, A. Pluciennicczak, W. Stec, A. Okruszek, A. Wilk and C.S. Cierniewski (Poland) 187

Identification of a novel 4 kDa immunoglobulin-A-binding peptide obtained by the limited proteolysis of jacalin
S. Kabir, R. Aebersold and A.S. Daar (Oman, Canada) 194

Selective oxidation of Met-192 in bovine α-chymotrypsin. Effect on catalytic and inhibitor binding properties
F. Cutruzzolà, P. Ascenzi, D. Barra, M. Bolognesi, E. Menegatti, P. Sarti, H.-P. Schnebli, S. Tomova and G. Amiconi (Italy, Switzerland, Bulgaria) 201

Purification and characterisation of 3-deoxy-D-*arabino*-heptulosonate-7-phosphate synthase from *Streptomyces rimosus*
F. Stuart and I.S. Hunter (UK) 209

The role of Cys-17 in the pyridoxal 5′-phosphate inhibition of the bovine liver low M_r phosphotyrosine protein phosphatase
P. Cirri, P. Chiarugi, G. Camici, G. Manao, L. Pazzagli, A. Caselli, I. Barghini, G. Cappugi, G. Raugei and G. Ramponi (Italy) 216

Studies on the subunit structure of textilotoxin, a potent presynaptic neurotoxin from the venom of the Australian common brown snake (*Pseudonaja textilis*). 3. The complete amino-acid sequences of all the subunits
J.A. Pearson, M.I. Tyler, K.V. Retson and M.E.H. Howden (Australia) 223

Thiamin-triphosphate-synthesizing activity of mutant cytosolic adenylate kinases: significance of Arg-128 for substrate specificity
T. Shioda, S. Yasuda, K. Yamada, M. Yamada, A. Nakazawa and T. Kawasaki (Japan) 230

Characterization of two major isoforms of juvenile hormone esterase from *Trichoplusia ni* (Lepidoptera)
G. Jones, M. Manczak, M. Wozniak and R. Ko'rrati (USA) 235

Physical and conformational properties of staphylokinase in solution
G. Damaschun, H. Damaschun, K. Gast, R. Misselwitz, D. Zirwer, K.-H. Gührs, M. Hartmann, B. Schlott, H. Triebel and D. Behnke (Germany) 244

The chloroperoxidase from the fungus *Curvularia inaequalis*; a novel vanadium enzyme
J.W.P.M. Van Schijndel, E.G.M. Vollenbroek and R. Wever (Netherlands) 249

Photoaffinity labeling of cytochrome $P\text{-}450_{11\beta}$ with methyltrienolone as a probe for the substrate binding region
T. Ohnishi, S. Miura and Y. Ichikawa (Japan) 257

Comparison of acceptor protein specificities on the formation of ADP-ribose · acceptor adducts by arginine-specific ADP-ribosyltransferase from rabbit skeletal muscle sarcoplasmic reticulum with those of the enzyme from chicken peripheral polymorphonuclear cells
M. Taniguchi, M. Tsuchiya and M. Shimoyama (Japan) 265

Differential scanning calorimetric study of 5-enolpyruvoyl shikimate-3-phosphate synthase and its complexes with shikimate-3-phosphate and glyphosate: irreversible thermal transitions
E.K. Merabet, M.C. Walker, H.K. Yuen and J.A. Sikorski (USA) 272

Chemical modification studies of the active site of glucosamine-6-phosphate synthase from baker's yeast
S. Milewski (Poland) 279

The differential effects of carbon monoxide and oxygen on the pressure dissociation of *Lumbricus terrestris* hemoglobin
R.E. Hirsch, J.P. Harrington and S.F. Scarlata (USA) 285

The differential lysis of phosphoester bonds by nuclease P1
H.C. Box, E.E. Budzinski, M.S. Evans, J.B. French and A.E. Maccubbin (USA) 291

Characterization of phosphoramidon-sensitive metalloproteinases with endothelin-converting enzyme activity in porcine lung membrane
T. Sawamura, O. Shinmi, N. Kishi, Y. Sugita, M. Yanagisawo, K. Gota, T. Masaki and S. Kimura (Japan, USA) 295

Structural characterization of *myo*-inositol monophosphatase from bovine brain by secondary structure prediction, fluorescence, circular dichroism and Raman spectroscopy
A.J. Ganzhorn, P. Vincendon and J.T. Pelton (France) 303

A model for prosthetogenic enzyme amplification assays
S. Harbron, M. Fisher and B.R. Rabin (UK) 311

Low spin quantitation of NiFeC EPR signal from carbon monoxide dehydrogenase is not due to damage incurred during protein purification
W. Shin and P.A. Lindahl (USA) 317

Selective modification of Sendai virus hemagglutinin neuraminidase by pyridoxal 5′-phosphate: evidence for an allosteric modulation of neuraminidase activity
T. Bellini, M. Tomasi and F. Dallocchio (Italy) 323

Changes in structure of α_2-macroglobulin upon reaction with trypsin as assessed by light scattering and differential scanning calorimetry
C.R. Middaugh, B.L. Steadman, P. Schurtenberger, D.C. Lee and J.F. Chlebowski (USA, Switzerland) 328

Rapid Report

Characterization of two novel subunits of the α-class glutathione *S*-transferases of human liver
H. Ahmad, S.S. Singhal, M. Saxena and Y.C. Awasthi (USA) 333

Cumulative Contents, Vol. 1161 337

Author Index 340
